Subject Index of Volume 184

Alanine
crystal structure of an Sm complex with β-ala, L1
Aluminium
metal oxide with low temperature $LiFeSnO_4$ type crystal structure: $(Cu, Zn)_4AlTaO_8$, 323
glass-forming ability of Al–Ce system: a thermodynamic approach, 139
magnetic and microstructural properties of Nd–Fe–Al alloys, 121
reaction kinetics of $MmNi_{4.5}A_{10.5}$–H system, 109
Antimony
Fe containing substitutes of structure types Pd_5Sb_2, 131
Arsenic
crystal structure of $U_6Ni_{20}P_{13}$ and $U_6Ni_{20}As_{13}$, L27

Bismuth
synthesis and structure of $Bi_2Fe_2Mn_2O_{10}$, 151
Boron
phase transformations in sputtered Nd–Fe–B alloys, 35

Cerium
glass-forming ability of Al–Ce system: a thermodynamic approach, 139
Chemical vapor deposition
CVD method for manufacture of SiC tubes, 219
Copper
effect of La_2O_3 addition on crystal structure of 2201-type Bi–Sr–Cu–O phase: $Bi_2Sr_2La_xCu_{1.25}O_{7.75+1.5x}$, L15
contribution on $KCuTa_2O_6$, L21
metal oxide with low temperature $LiFeSnO_4$ type crystal structure: $(Cu, Zn)_4AlTaO_8$, 323
preparation and crystal structure of $Na_4Cu_2S_2$, a thiocuprate with discrete anions, 265
structure refinements of $LiCu_2O_2$ and $LiCu_3O_3$ from neutron powder diffraction data, 315
kinetics and mechanism of low temperature corrosion of Ti with Cu(I) chloride. A comparison with Si and an Si–Ti alloy, 211
Corrosion
kinetics and mechanism of low temperature corrosion of Ti with Cu(I) chloride. A comparison with Si and an Si–Ti alloy, 211
Crystallography
crystallographic data, vibrational spectra and magnetic properties of lanthanide digermanates $Ln_2Ge_2O_7$, 25

Deoxidation
preparation and characterization of extra-low-oxygen Ti, 43
Diffusion
model calculations for hydride nucleation on oxide-coated metallic surfaces: surface- and diffusion-related parameters, 11

Erbium
orbital magnetization and Fe contribution to magnetic anisotropy of $Er_2Fe_{17}C_z$, 235

Germanium
crystallographic data, vibrational spectra and magnetic properties of lanthanide digermanates $Ln_2Ge_2O_7$, 25
Glasses
glass-forming ability of Al–Ce system: a thermodynamic approach, 139
Gold
information on $Ba_6Au_2O_{12}$, 187
synthesis and crystal structure of Au AAuX with A=Na, K, Rb or Cs, X=S, Se or Te, 87

HDDR magnets
production and characterization of bonded, hot-pressed and die-upset, HDDR magnets, 243
High-frequency levitation
kinetics of interaction of C and O in Nb during vacuum levitation melting, 305

kinetics of O and C removal from liquid Mo in high-frequency levitation in vacuum, 297
Holmium
crystal and magnetic structure of permanent magnetic material $Ho_2Fe_{14}C$, 161
Hydrides
model calculations for hydride nucleation on oxide-coated metallic surfaces: surface- and diffusion-related parameters, 11
Hydrogen
H-induced metal atom rearrangements in $Pd_{3+x}Mn_{1-x}$ alloys with $x=0$ using TEM, electrical resistivities and H_2 solubilities, 69
reaction kinetics of $MmNi_{4.5}A_{10.5}$–H system, 109
kinetics of H-induced ordering in Pd_3Mn to L12-type structure, 57
Hydrogen storage
synthesis, characterization and hydrogenation behaviour of Mg–$x$wt.%FeTi(Mn) and La_2Mg_{17}–$x$wt.%$LaNi_5$ – new H storage composite alloys, 1

Iron
crystal and magnetic structure of permanent magnetic material $Ho_2Fe_{14}C$, 161
crystal and magnetic structure of permanent magnetic material $Tm_2Fe_{14}C$, 175
magnetic and microstructural properties of Nd–Fe–Al alloys, 121
magnetic and structural properties of Fe and Mn lanthanide spinels, 203
orbital magnetization and Fe contribution to magnetic anisotropy of $Er_2Fe_{17}C_x$, 235
phase transformations in sputtered Nd–Fe–B alloys, 35
P–C–T relation of Sm_2Fe_{17}–N system, L5
vaporization behaviour of iron monotelluride, 285
synthesis and structure of $Bi_2Fe_2Mn_2O_{10}$, 151
production and characterization of bonded, hot-pressed and die-upset HDDR magnets, 243

Kinetics
reaction kinetics of $MmNi_{4.5}A_{10.5}$–H system, 109
kinetics of H-induced ordering in Pd_3Mn to L12-type structure, 57

Lanthanum
crystallographic data, vibrational spectra and magnetic properties of lanthanide digermanates $Ln_2Ge_2O_7$, 25
effect of La_2O_3 addition on crystal structure of 2201-type Bi–Sr–Cu–O phase: $Bi_2Sr_2La_xCu_{1.25}O_{7.75+1.5x}$, L15
synthesis, characterization and hydrogenation behaviour of Mg–$x$wt.%FeTi(Mn) and La_2Mg_{17}–$x$wt.%$LaNi_5$ – new H storage composite alloys, 1
Lithium
structure refinements of $LiCu_2O_2$ and $LiCuO_2$ from neutron powder diffraction data, 315
Lutetium
magnetic and structural properties of Fe and Mn lanthanide spinels, 203

Magnetic isotropy
orbital magnetization and Fe contribution to magnetic anisotropy of $Er_2Fe_{17}C_x$, 235
Magnetism
crystal and magnetic structure of permanent magnetic material $Ho_2Fe_{14}C$, 161
crystal and magnetic structure of permanent magnetic material $Tm_2Fe_{14}C$, 175
crystallographic data, vibrational spectra and magnetic properties of lanthanide digermanates $Ln_2Ge_2O_7$, 25
magnetic and microstructural properties of Nd–Fe–Al alloys, 121
magnetic and structural properties of Fe and Mn lanthanide spinels, 203
Manganese
magnetic and structural properties of Fe and Mn lanthanide spinels, 203
Molybdenum
A_2MoTiO_{7-x} (A=rare earth or Y): new series of oxide pyrochlores prepared by topochemical reduction of A_2MoTiO_8 scheelites, 343

kinetics of O and C removal from liquid Mo in high-frequency levitation in vacuum, 297

Neodymium
magnetic and microstructural properties of Nd–Fe–Al alloys, 121
phase transformations in sputtered Nd–Fe–B alloys, 35
production and characterization of bonded, hot-pressed and die-upset HDDR magnets, 243
Neutron powder diffraction
structure refinements of $LiCu_2O_2$ and $LiCu_2O_3$ from neutron powder diffraction data, 315
Nickel
crystal structure of $U_6Ni_{20}P_{13}$ and $U_6Ni_{20}As_{13}$, L27
reaction kinetics of $MmNi_{4.5}Al_{0.5}$–H system, 109
synthesis, characterization and hydrogenation behaviour of Mg–$x$wt.%FeTi(Mn) and La_2Mg_{17}–$x$wt.%$LaNi_5$ — new H storage composite alloys, 1
Niobium
kinetics of interaction of C and O in Nb during vacuum levitation melting, 305
synthesis and structure of Nb_5SiTe_6, new layered ternary Nb telluride compound, 257
Nitrogen
P–C–T relation of Sm_2Fe_{17}–N system, L5
Nucleation
model calculations for hydride nucleation on oxide-coated metallic surfaces: surface- and diffusion-related parameters, 11

Osmium
pyrite-type $RuS_{2-2x}Se_{2x}$ and $Ru_{1-x}Os_xS_2$ solid solutions: X-ray structure determination and Raman spectra, 275
Oxide coatings
model calculations for hydride nucleation on oxide-coated metallic surfaces: surface- and diffusion-related parameters, 11

Palladium
H-induced metal atom rearrangements in $Pd_{3+x}Mn_{1-x}$ alloys with $x=0$ using TEM, electrical resistivities and H_2 solubilities, 69
kinetics of H-induced ordering in Pd_3Mn to L12-type structure, 57
phase diagram of Pd–Pr below 50at.% Pr, L9
Fe containing substitutes of structure types Pd_5Sb_2, 131
Praseodymium
phase diagram of Pd–Pr below 50at.% Pr, L9
Pyrochlores
A_2MoTiO_{7-x} (A=rare earth or Y): new series of oxide pyrochlores prepared by topochemical reduction of A_2MoTiO_8 scheelites, 343

Raman spectroscopy
pyrite-type $RuS_{2-2x}Se_{2x}$ and $Ru_{1-x}Os_xS_2$ solid solutions: X-ray structure determination and Raman spectra, 275
Rubidium
synthesis and crystal structure of Au AAuX with A=Na, K, Rb or Cs, X=S, Se or Te, 87
Ruthenium
preparation and structure determination of $Ba_6Ru_{3.33}Ta_{1.67}O_{18}Cl_2$, 195
pyrite-type $RuS_{2-2x}Se_{2x}$ and $Ru_{1-x}Os_xS_2$ solid solutions: X-ray structure determination and Raman spectra, 275
standard molar Gibbs free energy of formation on URu_3(s), 329

Samarium
P–C–T relation of Sm_2Fe_{17}–N system, L5
crystal structure of an Sm complex with β-ala, L1
Scheelites
A_2MoTiO_{7-x} (A=rare earth or Y): new series of oxide pyrochlores prepared by topochemical reduction of A_2MoTiO_8 scheelites, 343
Selenium
magnetic and structural properties of Fe and Mn lanthanide spinels, 203
pyrite-type $RuS_{2-2x}Se_{2x}$ and $Ru_{1-x}Os_xS_2$ solid solutions: X-ray structure determination and Raman spectra, 275
synthesis and crystal structure of Au AAuX with A=Na, K, Rb or Cs, X=S, Se or Te, 87

SiC
CVD method for manufacture of SiC tubes, 219
Silicon
synthesis and structure of Nb_3SiTe_6, new layered ternary Nb telluride compound, 257
kinetics and mechanism of low temperature corrosion of Ti with Cu(I) chloride. A comparison with Si and an Si–Ti alloy, 211
Silver
new phase in Tl–Ag–Te system: crystal structure of $Tl_2Ag_{16}Te_{11}$, 337
Strontium
effect of La_2O_3 addition on crystal structure of 2201-type Bi–Sr–Cu–O phase: $Bi_3Sr_2La_xCu_{1.25}O_{7.75+1.5x}$, L15

Tantalum
preparation and structure determination of $Ba_6Ru_{3.33}Ta_{1.67}O_{18}Cl_2$, 195
contribution on $KCuTa_2O_6$, L21
metal oxide with low temperature $LiFeSnO_4$ type crystal structure: $(Cu, Zn)_4AlTaO_8$, 323
Tellurium
new phase in Tl–Ag–Te system: crystal structure of $Tl_2Ag_{16}Te_{11}$, 337
study of vaporization behaviour of Fe monotelluride, 285
synthesis and structure of Nb_3SiTe_6, new layered ternary Nb telluride compound, 257
order–disorder transformation in V_3Te_4, 95
synthesis and crystal structure of Au AAuX with A=Na, K, Rb or Cs, X=S, Se or Te, 87
Thallium
new phase in Tl–Ag–Te system: crystal structure of $Tl_2Ag_{16}Te_{11}$, 337
Thermodynamics
standard molar Gibbs free energy of formation on $URu_3(s)$, 329
Thiocuprate
preparation and crystal structure of $Na_4Cu_2S_3$, thiocuprate with discrete anions, 265
Thulium
crystal and magnetic structure of permanent magnetic material $Tm_2Fe_{14}C$, 175
Titanium
A_2MoTiO_{7-x} (A=rare earth of Y): new series of oxide pyrochlores prepared by topochemical reduction of A_2MoTiO_8 scheelites, 343
preparation and characterization of extra-low-oxygen Ti, 43
synthesis, characterization and hydrogenation behaviour of Mg–$x$wt.%FeTi(Mn) and La_2Mg_{17}–$x$wt.%$LaNi_5$ — new H storage composite alloys, 1
kinetics and mechanism of low temperature corrosion of Ti with Cu(I) chloride. A comparison with Si and an Si–Ti alloy, 211
Transformation
order–disorder transformation in V_3Te_4, 95
Transmission electron microscopy
H-induced metal atom rearrangements in $Pd_{3+x}Mn_{1-x}$ alloys with $x=0$ using TEM, electrical resistivities and H_2 solubilities, 69

Uranium
crystal structure of $U_6Ni_{20}P_{13}$ and $U_6Ni_{20}As_{13}$, L27
standard molar Gibbs free energy of formation on $URu_3(s)$, 329

Vanadium
order–disorder transformation in V_3Te_4, 95
Vaporization
study of vaporization behaviour of Fe monotelluride, 285
Vibrational spectroscopy
crystallographic data, vibrational spectra and magnetic properties of lanthanide digermanates $Ln_2Ge_2O_7$, 25

Ytterbium
magnetic and structural properties of Fe and Mn lanthanide spinels, 203
Yttrium
A_2MoTiO_{7-x} (A=rare earth or Y): new series of oxide pyrochlores prepared by topochemical reduction of A_2MoTiO_8 scheelites, 343

Zinc
metal oxide with low temperature $LiFeSnO_4$ type crystal structure: $(Cu, Zn)_4AlTaO_8$, 323
